

LAB V: DESIGN A SIMPLE CPU INTERPRETER USING PYTHON

Siksha 'O' Anusandhan (Deemed to be University),
Bhubaneswar

Branch:		Section:	
S. No.	Name	Registration No.	Signature

Marks: ____/10

Remarks:

Teacher's Signature

Objectives:

1. Design a CPU interpreter in python that interprets the data transfer instruction.
2. Design a CPU interpreter in python that interprets the data transfer and branch instructions.
3. Design a CPU interpreter in python for the addition of first ten numbers.
4. Design a CPU interpreter in python that interpretes different arithmetic and logical operations.

Post Lab:

1. Explain how branching instructions affect the program counter (PC).
2. What are the three types of buses in a computer?
3. Explain the Von Neumann architecture.
